

# WINTER CENTERS OF EXCELLENCE

Our Winter Center Of Excellence Program operates in the down time of club players with the aim of maximizing each player's development. It runs for 6-weeks in the time frame of Thanksgiving to the 3rd week of January. The program success is achieved by providing each player with professional coaching, age specific technical and physiological programs, top class facilities and an extensive support program on and off the training field.

Our aim is to develop confident, technical players whilst teaching essential Social skills such as good sportsmanship and respect, in addition to a good attitude to practice and play.
